SUNDAY, : : : : AUGUST 1, 1875. CITY AND COUNTRY-TRADE PROS PECTS. Memphis is destined to be the Impe rial city of the south. A succession of misfortunes has, for the past three years, retarded her growth and prevented any great increase of population, or the completion of enterprises which are importast to her prosperity. But our central location in a rich country, celebrated for the salubrity of its climate, are written and talked of outside of our borders in a way they were never written and talked of before. We believe that Memphis is destined to increase in wealth and population rapidly; that she has reached a point in her career when it only needs for her merchants and busi ness men to take advantage of the opportunities now opening to them. We intend, so far as in us lies, that the Apindustrial interests, and the promotion may tend to strengthen the potrade to which we aspire, and which is grants. Yet it seems hardly probable sending out commercial ambassadors, cordingly. armed with such a panoply of facts as tide of fortune would be shunned by the memory of Lord Byron. We copy into and Memphis would make herself the ceedings of the meeting held in Longrand commercial and manufacturing don, over which Mr. Disraeli presided, emporium of a country whose extensive and at which he paid a worthy tribute trade could not fail to make the largest to the great poet.
